

## **Eucharistic Miracle—Guadalajara, Mexico—2013**

Blood collecting at the bottom had to be periodically wiped away to prevent dripping

A Mexican priest is claiming that, after hearing the voice of God, the host which he had just consecrated began to bleed. The bloody host was available for adoration for some time, at which point the Archbishop ordered the Host to be reposed until further investigation. *“This is a time of great blessing for this community and for the whole world.”* says Father Jose Dolores Castellanos Gudino of the phenomenon that occurred in his parish yesterday after blood flowed from a consecrated host.

Amid songs, clapping, tears, long lines and cell phones trying to capture the moment, thousands of faithful Catholics and non-believers alike visited the Parish of Mary Mother of the Church located in Colonia Jardines de la Paz (Guadalajara, Mexico) to witness the alleged miracle.

Fr. Lolo stated, *“I heard [the voice] tell me that a niche for the adoration of souls would be established in this community, and that if at any time they want to perform studies that require a part [of the host] that they may do all the studies they want.”*

The Bishop has launched an investigation into this phenomena and Fr. Lolo is undergoing a set of tests to determine if what he saw was from God.
